LockerManager® Features

Students

Quickly assign lockers to students. What took days to assign will be reduced to minutes! Assign lockers by groups; sort students by grade, homeroom, or gender, then assign them to lockers by number, location, or at random. No more cut and paste!

For quick data entry, LockerManager® easily imports students electronically from your existing student information system, or spreadsheet system.

Simplifies day-to-day locker administrative duties such as forgotten combinations and new student additions with simple, logical information screens, pop-ups, and icon driven navigation.

Locks

Simplify your annual built-in combination roll-overs with a quick touch of a button. With LockerManager® you can advance combinations in your database by one (or select a specific locker combination sequence) for all lockers or just for a specific group of lockers.

Import Master Lock control charts electronically, through the available quick initial software set-up.

Export control charts directly to a spreadsheet.

Supports built-in locks as well as portable combination padlocks.

Lockers

LockerManager® simplifies registration! Easily produce stickers with student name, locker number, locker location, and combination to apply to student registration packets. Or, easily transfer locker assignment information back into your student information system.

For initial quick software set-up, automated process that quickly teaches Locker Manager about your locker arrangement.

Variety of standard reports available: Facilitates communication for locker administration and maintenance activities

Easy to Use

Intuitive icon driven navigation. On screen prompting.

Data manipulation through grab, highlight, point, and click functionality.

Includes step-by-step pictorial user guide.

Perform common tasks with only a few clicks of the mouse. For example, only 1 step operation to add a mid-year arrival student to the database and assign a locker.

Try it for Yourself!

LockerManager® gives you the tools you need to manage and organize your lockers - saving valuable time and headaches.

Save time when you integrate the efficient and lightning fast usability of LockerManager® into your school. Allows you to quickly sort through student information and manipulate your information with ease.

Instantly assign a locker to every student in your school, without the hassle of rearranging an entire spreadsheet. No more manual or inefficient data handling hassles!

Efficient and simple annual locker combination roll-overs. Streamline the process with the LockerManager® system.

Provide more than just locker combinations. Store student and teacher schedules, emergency contacts and student fees.

System Requirements

- Windows 98, 98SE, ME, NT2000, XP, Vista
- 50 MB available hard drive space
- designed for XVA resolution at 1026x768 or higher
